Integrated Geriatrics Practice

announcing the

Integrated Geriatrics Practice

A multidisciplinary assessment clinic for
complicated patients

*Please consider sending your elderly patients with complex medical conditions to the **Integrated Geriatrics Practice**, conducted on Friday mornings by the departments of Family Medicine, Internal Medicine, and Neuropsychiatry.*

Integrated Geriatrics Practice highlights:

- Opportunity for patient evaluation by a multidisciplinary team including a geriatrician, neuropsychiatrist, primary care physician, pharmacist, social worker and nurse care manager.
- Access to nutritionists, behavioral scientists, nurses, and other health care professionals as warranted.
- Treatment and therapy recommendations sent to the referring physician.
- Referring physicians welcome to participate in the multidisciplinary visit.
- The Integrated Geriatrics Practice does not supplant the patient's primary care provider; all patients are sent back to the PCP.
- Most insurance plans accepted.

*To refer patients, call 743-2757
to schedule an appointment.*

*For more information, contact Family Medicine Head Nurse
Alice Vaughn, RN, at 806-743-2757*

Supported in
part by a grant
